TECHNICAL DATA

Sedum Blanket

A pre-cultivated UK grown vegetation blanket containing 8 to 12 species

Axter's UK grown high quality Sedum Blanket contains 8 to 12 species as a pre-grown vegetation cover for use on extensive low maintenance green roof projects.

Species Sown

Sedum acre
Sedum album
Sedum ellacombianum
Sedum floriferum
Sedum forsterianum
Sedum hybridum
Sedum kamtschaticum
Sedum montanum
Sedum reflexum
Sedum selskianum
Sedum sexangulare
Sedum spurium

Physical Properties

Base:	Geo composite polypropylene mesh/coir blanket
Growing medium:	20mm Sedum Mix
Vegetation:	Mature Sedum plants grown from rhizome (rootstock) and seed
Total Height:	20-50mm
Weight (dry):	15kg/m ²
Weight (saturated):	20kg/m ²

Minimum recommended substrate depth under blanket : 60mm

Installation and maintenance

The substrate must be watered prior to and after planting, and the system must be kept moist for a minimum of 3 months following installation and as climatic weather conditions dictate.

Sedum green roofs are relatively low maintenance. However, Axter Ltd recommends a minimum of 2 visits per year for potential remedial work (weeding) and inspection of rainwater outlets.

The manufacturer reserves the right without prior notice to modify the composition of these products. Characteristics provided in this publication derive from data obtained under controlled test conditions. Axter Ltd makes no warranties, express or implied, as to the properties and performance under any variations from such conditions in actual construction.
